Group Visions

Consolidating the company's brand in various markets at the international and local levels by being in the competitive field, and building mutual trust between us and our customers,

We work under the slogan of **success starts from the success and satisfaction of the customer.**

With each day, we make our mark to provide an ultra-modern definition of service while providing different technologies and solutions to all organizations.

Working to keep pace with the development in performance and specifications to reach our goal, which is the maximum satisfaction of our customers
Ultimately, we aspire to become your business partner rather than a lifelong business executive.

GROUP VISION

Group Branches

Environmental Services

We seek and are committed to keeping pace with the Kingdom's Vision 2030, which is built on three pillars: a vibrant society, a thriving economy, and an ambitious nation.

The Kingdom's vision "2030" sees the preservation of the environment and natural resources as a religious, social and moral duty, and accordingly, our company believes as we see it as our duty to provide environmental services that enhance this concept.

Our projects aim to raise the efficiency of waste management and reduce pollution, and our projects focus on recycling waste, protecting the environment and providing environmental logistical solutions in the areas of commercial and industrial waste transportation, and in our company we are committed to applying general standards using the best technologies and human cadres.

One of the main tasks of the company is city cleaning and waste disposal services. These services provide government projects to achieve the highest levels of environmental health, using modern methods such as equipment, machinery and consumables.

The highest levels of environmental health are also achieved by ensuring that there are no negative environmental impacts.

Waste recycling can be defined as a process in which industrial, agricultural and medical waste is recycled to organize an integrated waste management process among all parties involved according to their respective competencies.

These operations aim to reduce, sort, transport and recycle waste to achieve environmental sustainability, preserve public health, and reduce the negative impact and accumulation of this waste on the environment.

Commercial:

Transporting commercial waste and documenting the annual cleaning contracts with the municipality.

Structural:

Transportation of construction waste (demolition and construction).

Private and public contracts:

Transfer of commercial and construction waste on annual contracts to the public and private sectors.

SERVICES

Types of services:
